

Best Practice I

1. Title: Sir Albert Howard Clava: The Organic Farming Club

2. Objectives of the Practice

The club is a gentle initiative towards promoting the organic farming practice among the young generation.

3. The Context

The most dominant challenges faced in the field of organic farming is preventing various syndromes affecting the vegetation. Developing and adopting the best practices in farming is even more complex and require utmost importance.

4. The Practice

In the world where artificial products ruin, the traditional organic farming techniques which produce fresh and natural vegetables deserves appreciation and support from the society. The growth of this practise will in turn lead to healthy food and thereby impart salutariness.

5. Evidence of Success

The club bagged appreciation from the Agriculture Department, Govt of Kerala for the active participation of students in practicing organic farming at home using grow bags and seeds provided from the Agriculture Dept. Office Ettumanoor. The club also conducted exhibition and food fests using the products obtained from their own home farms.

6. Problems Encountered and Resources Required

The problem encountered was to provide proper ambience for the better growing of the seeds. It includes soil, light, water and manure. The talk by Dr Sherly Agr. Officer was really an informative one and students followed the instructions and practices and could tackle all the problems faced in the cultivation.
